

scooter⁺

scooter+

“the UK micromobility industry is surging with both vehicle diversity and operating models rapidly expanding, but we are only scratching the surface.”

scooter⁺

“we believe there is an opportunity to stretch the definition of micromobility by creating a PLEV designed to expand the utility of e-scooters for business use, commuting and leisure.”

scooter⁺

“introducing scooter⁺
a vehicle designed to
bridge the gap between
e-scooters and cargobikes,
and leverage existing
bicycle infrastructures.”

scooter⁺

“designed to deliver across a wide range of use cases.”

childseat compatible

80 litre lockable storage

50cm² cargo bed

scooter⁺

“designed to instill confidence through simple, intuitive features.”

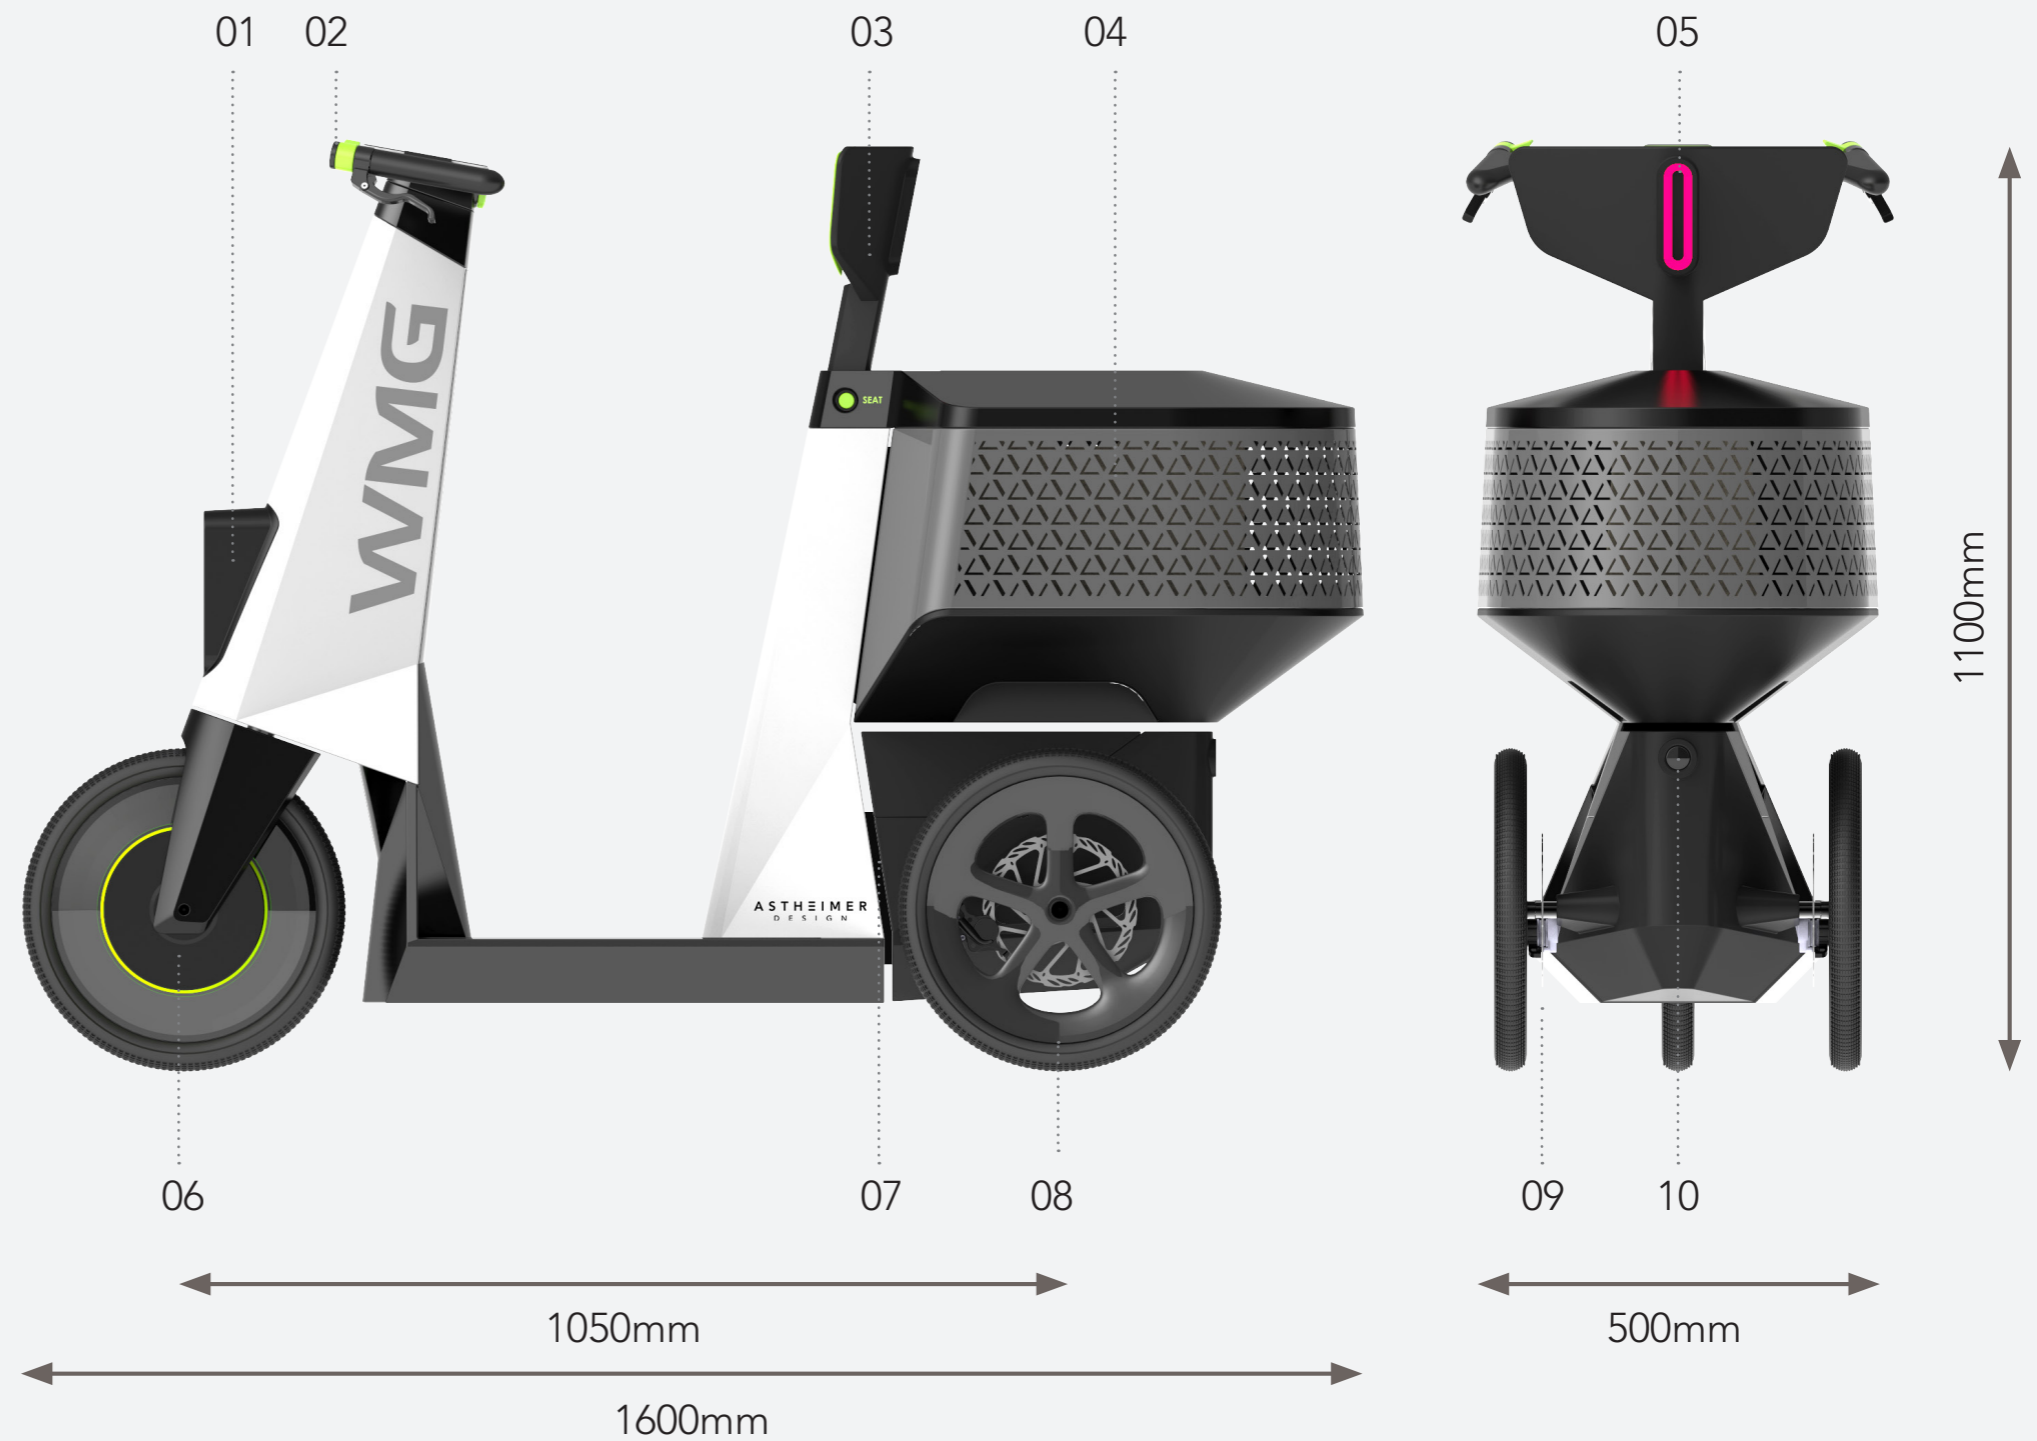

combining a self-corrective tilting frame, a side-by-side footplate, multi level lighting and back support to deliver comfort and control on short to mid-range trips.

scooter⁺

“designed to be compact and be seen”
